LAPPDs:
How should we respond to the PAC in summer, regarding readiness?
What development steps can we make to show progress towards ANNIE?
Costs and person power?

Water volume:
What can we do to work out hi-potting in water, before commercial LAPPDs are ready? Costs and person power?
How to attach them to the tank? Costs and person power?
Cost and design issues for the tank?

PMTs:
What do we have available?
What work, costs, and person power to get them ready?
